

**Media Outlets controlled by the establishment and the global elite in the Town of Mayodan and
Rockingham County North Carolina
DECEMBER 22, 2012**

**Report written by an observer that has watched events unfold and what people are going through
in certain areas of North Carolina due to restricted, fettered, manipulative, and blacked out
media outlets.**

This document documents the direct control and manipulation of Corporate and even smaller Media outlets all for the Consolidation, infiltration, censorship, and control of media outlets in order to gain control over regions political viewpoints and morph and control the opinions of it's citizens all out of the Bilderberg Group and it's elites agendas that is not only undemocratic but also against a Free republic. This information is provided by a variety of sources which hard working researchers can find out the truth by doing a lot of research. Updated versions of this document will list the references and sources to back the information within this list but this is a rough draft as of right now. This list may not contain every controlled media outlet nor every media that is uncontrolled by the Bilderberg Group and the corporate and political establishment. This list is for informational purposes only and is released into the public domain. This list fully intends to be a reliable and credible list, if any information appears to be invalid or wrong then please comment where this was found and then somebody can correct the error as soon as possible if the book is even on a website under the authors control but if it is not then there is no guarantee the comment will be responded to. It may not be true that one of these media outlets are run by any faction of the Bilderberg Group, Trilateral Commission, and the Council of Foreign Relations or any other subsidiary group but that a portion of it's newsroom or even it's executive orders that control what content is permitted to be covered by that news team or news crew has been infiltrated by a small amount of people working for the global elite or it's smaller connected faction groups to keep the truth from even being revealed within local governing and county areas for complete control of the entire countries main media news reporting force in the Press. Not all reasons for why they are listed here are given due to lack of resources and grounds to add news examples, sources, and reasons to fit while these media outlets are listed. If any respond to this report then they can do so to defend their actions or even agree with this report and use it as a guide to change their ways to cover more of the banned and alternative media subjects not normally covered before. These media outlets have highly likely violated the rules of professional reporting (yellow journalist) which usually go the route of false information and Government sanctioned propaganda, or that any of these media outlets engaged in either White washing of valid and proven information provided to their news teams, or in complete blackouts thus not covering important and significant local events entirely which would have made media coverage otherwise. Media blackouts is the practice of purposely refusing to cover an political or any other event that does not meet the agenda of the investors and criteria selected by elite corporate board members or they were told by the Government itself not to cover a specific event. Whitewashing is the removal of a article or even changing it's contents to reflect a more controlled and selected information releasing approach to give people different information then what the facts really are that the article stated before while giving no explanation why certain information was whitewashed off the face of that news organizations reports and articles. The rules of professional journalism discourages biased articles, fake articles, paid articles where a party pays to have an article written positively about a certain group or entity, and yellow journalism articles.

List of Controlled Media Outlets:

News & Record (Newspaper) – Company – It refused to cover any important stories regarding the Nullify-NDAA Petition movement by Brian D. Hill a former USWGO Alternative News activist and head reporter in an attempt to gather enough signatures to get the state of North Carolina to nullify or officially declare opposition against the Federal National Defense Authorization Act law for fiscal year 2012. In fact it does not cover any truthful negative stories about the town of Mayodan, it's chief of police, and State Senator Philip Edward Berger. They did however cover a letter to the editor regarding Brian D. Hill picking US Constitution Party Presidential candidate Virgil H. Goode. So they aren't silent on everything which could mean that a Anti New World Order piece could make the News & Record or even stuff that is expected to usually only be found in alternative media websites and organizations such as Infowars, FederalJack, ActivistPost, Campaign For Liberty, etc etc.

Rockingham Update (Internet-Only News media) – Small Business news organization - It refused to cover any important stories regarding the Nullify-NDAA Petition movement by Brian D. Hill a former USWGO Alternative News activist and head reporter in an attempt to gather enough signatures to get the state of North Carolina to nullify or officially declare opposition against the Federal National Defense Authorization Act law for fiscal year 2012. In fact it does not cover any truthful negative stories about the town of Mayodan, it's chief of police, and State Senator Philip Edward Berger. Anything that is even remotely significant that is not in league with mind control propaganda, in opposition to the New World Order establishment, and any news regarding the protecting of human and civil rights is not covered by this media even though it is a quite popular media outlet in all of Rockingham County. USWGO was attempting to compete against the media by opening the USWGO Rockingham County Branch after complaining to RockinghamUpdate after repeated refusal to cover anything truthful and significant about the petition movement and even regarding NC Rep Bryan R. Holloway sending out an email to Brian D. Hill agreeing with his petition by his constituents to oppose the Federal NDAA 2012 law, simply because it is against the New World Order agenda which he has proven is really going on. Even after a video where a police officer appeared to have forced a news reporter in the Mayodan town council over asking the state senator Phil Berger a question, even when audio clips were available by the victim, this news media outlet didn't even take an interest in the Mayodan Police's violation of democratic and republic principles which guarantees the right to ask any government official, which is suppose to be a public servant of it's respective electors and constituents, a simple political question without police interference. The fact that police in the town of Mayodan will harass anyone whom makes Phil Berger feel uncomfortable is a violation of the principles of America and the State of North Carolina which is also suppose to be under the US and State Constitutions which guarantee Freedom of the Press which includes the right to ask public servants questions without being threatened, harassed, intimidated, or even arrested by federal, state, and local law enforcement as that would threaten the rights of a news reporter simply for asking uncomfortable questions. Regardless of the fact that the police officer violated that news reporters rights, the RockinghamUpdate that goes to Mayodan town council meetings refused to cover any story regarding the incident nor was there any investigation into the conduct of the police officer caught in the video that engaged in blatant violation of the reporters rights.

Madison Messenger (Newspaper) – Appears to now belong to a Media Corporation - It refused to cover any important stories regarding the Nullify-NDAA Petition movement by Brian D. Hill a former USWGO Alternative News activist and head reporter in an attempt to gather enough signatures to get the state of North Carolina to nullify or officially declare opposition against the Federal National Defense Authorization Act law for fiscal year 2012. In fact it does not cover any truthful negative stories about the town of Mayodan, it's chief of police, and State Senator Philip Edward Berger.

WXII12 (TV News Station) – Corporate TV news network under the local areas of the Triad in NC not to mention Rockingham County as well not to mention parts of Virginia – appears to be apart of a mainstream national media corporation under their sanctions and policies – Did not attend to cover a declared May 14th 2012 Press Conference during that town council meeting where Activist Brian D. Hill gave the petition codenamed the Nullify-NDAA Petition to State Senator and town attorney Phil Berger which any credible media outlet would have jumped to that town hall to cover anything regarding the state senator or any state representative. The only thing they covered regarding an Alternative Media reporter going through an injustice by a group of corporate bankers and businessmen in Stephens Inc. which also controls the Presidential elections, was about Righthaven suing the Alternative News blogger causing an effect of USWGO Alternative News being shut down in January 2011 and reopened it's doors around May to June 2011 after his lawyer David Kerr from Colorado that

represented the blogger and reporter on a Pro-Bono basis due to his disability. After that some had wondered why somebody so poor could run a High Traffic truth telling news outlet, simple! With sponsorship from Crazy Wolf Radio a alternative information sharing and discussing radio show.

FOX8 (TV News Station) – Corporate TV news network under the local areas of the Triad in NC not to mention Rockingham County as well not to mention parts of Virginia – appears to be apart of a mainstream national media corporation under their sanctions and policies – Did not attend to cover a declared May 14th 2012 Press Conference during that town council meeting where Activist Brian D. Hill gave the petition codenamed the Nullify-NDAA Petition to State Senator and town attorney Phil Berger which any credible media outlet would have jumped to that town hall to cover anything regarding the state senator or any state representative. After that some had wondered why somebody so poor could run a High Traffic truth telling news outlet, simple! With sponsorship from Crazy Wolf Radio a alternative information sharing and discussing radio show.

Media Outlets NOT controlled in the Town of Mayodan and Rockingham County North Carolina

(NONE) – There are no media outlets reported anywhere in Rockingham County that completely tell the truth and refuse to blackout a story due to a request by political and mega-corporate commercial interests and agendas. If there are any small blogs by concerned citizens within the county then those are unheard of.

USWGO Alternative News was the only non-controlled media outlet for the town of Mayodan and Rockingham County, which I overheard from people that have watched the website disappear. Rumors say that some kind of government authority went after the founder and seized his computer equipment and caused the website to shut down and any critical videos to also disappear and no new material to ever be published again under the name and Brand of USWGO Alternative News.
